

Harbour Information: Fendering

Masters and agents are advised that Aberdeen Harbour Board do **not** provide fendering on their berths.

Vessels who do not have their own permanent fendering may wish to have fenders arranged by their agent or make their own provisions for fendering.

The only berth that has permanent fendering is Matthews North.

Agents arranging fenders for the vessel should ensure the fenders arrive prior to the arrival of the vessel, have personnel in attendance for the arrival of the vessel to the berth and are positioned correctly. Aberdeen Harbour Boatmen are not responsible for adjusting fenders that are not correctly positioned for the vessel.

Fenders should be removed as soon as practical once the vessel has departed.

If fenders are not positioned prior the vessels arrival this may result in delays to the berthing of the vessel. Traffic clearance for vessels who require fendering on the berth may not be given if the fendering is not in place prior to the boarding of a pilot.
